# Mathematics

**Advanced**

**Paper 1: Pure Mathematics 1**

Wednesday 6 June 2018 – Morning

**Time: 2 hours**

Paper Reference

**9MA0/01**

**You must have:**

Mathematical Formulae and Statistical Tables, calculator

Total Marks

**Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

## Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Answers should be given to three significant figures unless otherwise stated.

## Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 14 questions in this question paper. The total mark for this paper is 100.
- The marks for each question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

## Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end

Pearson

Answer ALL questions. Write your answers in the spaces provided.

1. Given that  $\theta$  is small and is measured in radians, use the small angle approximations to find an approximate value of

$$\frac{1 - \cos 4\theta}{2\theta \sin 3\theta}$$

Question 2 continued

Handwriting practice area with 28 horizontal lines.

(Total for Question 2 is 7 marks)

3.

Figure 1

Figure 1 shows a sector  $AOB$  of a circle with centre  $O$  and radius  $r$  cm.

The angle  $AOB$  is  $\theta$  radians.

The area of the sector  $AOB$  is  $11 \text{ cm}^2$

Given that the perimeter of the sector is 4 times the length of the arc  $AB$ , find the exact value of  $r$ .

(Total for Question 3 is 4 marks)

4. The curve with equation  $y = 2\ln(8 - x)$  meets the line  $y = x$  at a single point,  $x = a$ .

(a) Show that  $3 < \alpha < 4$

(2)

### Figure 2

Figure 2 shows the graph of  $y = 2\ln(8 - x)$  and the graph of  $y = x$ .

A student uses the iteration formula

$$x_{n+1} = 2 \ln(8 - x_n), \quad n \in \mathbb{N}$$

in an attempt to find an approximation for  $\alpha$ .

Using the graph and starting with  $x_1 = 4$

(b) determine whether or not this iteration formula can be used to find an approximation for  $\alpha$ , justifying your answer.

(2)

Question 4 continued

Lined area for writing the answer to Question 4.

(Total for Question 4 is 4 marks)

5. Given that

$$y = \frac{3 \sin \theta}{2 \sin \theta + 2 \cos \theta} \quad -\frac{\pi}{4} < \theta < \frac{3\pi}{4}$$

show that

$$\frac{dy}{d\theta} = \frac{A}{1 + \sin 2\theta} \quad -\frac{\pi}{4} < \theta < \frac{3\pi}{4}$$

where  $A$  is a rational constant to be found.

(Total for Question 7 is 7 marks)

8. The depth of water,  $D$  metres, in a harbour on a particular day is modelled by the formula

$$D = 5 + 2 \sin(30t)^\circ \quad 0 \leq t < 24$$

where  $t$  is the number of hours after midnight.

A boat enters the harbour at 6:30 am and it takes 2 hours to load its cargo.

The boat requires the depth of water to be at least 3.8 metres before it can leave the harbour.

- (a) Find the depth of the water in the harbour when the boat enters the harbour.

(1)

- (b) Find, to the nearest minute, the earliest time the boat can leave the harbour.

(Solutions based entirely on graphical or numerical methods are not acceptable.)

**10.** The height above ground,  $H$  metres, of a passenger on a roller coaster can be modelled by the differential equation

$$\frac{dH}{dt} = \frac{H \cos(0.25t)}{40}$$

where  $t$  is the time, in seconds, from the start of the ride.

Given that the passenger is 5 m above the ground at the start of the ride,

- (a) show that  $H = 5e^{0.1 \sin(0.25t)}$

- (b) State the maximum height of the passenger above the ground. (1)

The passenger reaches the maximum height, for the second time,  $T$  seconds after the start of the ride.

- (c) Find the value of  $T$ . (2)

(Total for Question 11 is 10 marks)

**12.** The value, £ $V$ , of a vintage car  $t$  years after it was first valued on 1st January 2001, is modelled by the equation

$$V = Ap^t \quad \text{where } A \text{ and } p \text{ are constants}$$

Given that the value of the car was £32 000 on 1st January 2005 and £50 000 on 1st January 2012

- (a) (i) find  $p$  to 4 decimal places,
- (ii) show that  $A$  is approximately 24 800
- (b) With reference to the model, interpret
- (i) the value of the constant  $A$ ,
- (ii) the value of the constant  $p$ .

Using the model,

- (c) find the year during which the value of the car first exceeds £100 000 (4)
